Introduction

We are pleased to present ICO Market Weekly Review #14 in 2019. This research aims to be your weekly guide to the ICO market and the blockchain community and it is based on the data that we carefully gather at ICObench to provide the best analytics.

Since the increase of the popularity of ICO market, almost \$25B has been raised altogether. With over 5,400 projects and 75K professional profiles in enterprise and blockchain published on the platform, we can ensure a clear outlook of the market and its community.

We have processed and organized a huge amount of data for this report to show you the ICO market and its community's widely differing sides — specifically ICO market size for a variety of industries, projects trending this week and countries leading in "crypto". We hope that the data in the report will be useful to you.

As always, we work on improvements and will be happy to know if you want to see any additional information in the ICO Market Weekly Review.

Thank you for choosing ICObench and we are looking forward to your feedback.

ICO expert opinions

[Micouin Guillaume](#)

In the first quarter of 2019, ICOs raised approximately \$118 million, 58 times less than the first quarter of the previous year \$6.9 billion was raised at this time according to the Wall Street Journal (WSJ) of March 31, 2019.

It can be explained by two important factors, the first being the increased caution of investors towards these investments following the regulations made with regard to non-compliant ICOs (or scam). The second important one being the downward trend in the market over the past year, which did not encourage investment.

Recent reports on more than 2500 projects shows that only 45% of ICOs were successful in raising funds. More importantly, this report states that only 15% of the tokens issued during the ICOs succeed in reaching the initial prices announced during their ICO on the various trading platforms.

However, the private sector and government regulators around the world are paying considerable attention to secure token offerings (STOs). It will probably become the ICO successor.

Although all this does not work in favour of ICO, it is good to note that there are still a lot of projects emerging nowadays. Everyone should remember that the credibility of the project, as well as the team around it, is crucial to raise funds.

[Ajit Kumar Jain](#)

Despite the tumultuous landscape and trust issues, ICOs have still come to constitute one of the more innovative routes for technological development. Compared to traditional startup and company founding paths, which requires months of lengthy fundraising, ICOs allow small teams to develop and market coins with speedy turnarounds, for better or worse.

ICOs are not going to vanish; they are just going to evolve. Investors are more cautious in picking the right one to invest in, and ICOs are making their products not only the ideas.

Thank you

We are looking forward to your feedback.
