## Executive Summary

This reports presents the cumulative statistics of two weeks of the October. Regretfully, the IEO & ICO market performance in October is terrible. Overall, for the past two weeks, it was only raised almost \$700k. There were 18 projects completed for the past two weeks where only two projects have only raised funds. In short words, the market in October has stepped the way of the lowest historical values. Thus, the raised amount of \$700k is the lowest amount of weekly raised ever. Even on monthly scale, October has raised \$33.4M that is at least ten times less than September has raised.

However, the average rating has jumped to 4.0 and matched the level of the beginning of the September. Based on funds raised, it was only possible to make top-2 for the countries and projects. Thus, MoonTrader is the leader of the weekly top-2 with its \$437k. The second place is taken by ICOIN IEO with \$200k. Therefore, based on the projects that raised funds Moldova and Sierra Leone are first timers in the country top and take the lead by countries.

At the same time the projects DACX and FRED Energy obtained the highest ratings of the week, 5.0 and 4.9 respectively. The Satt an Worldopo are still on top by the amount of ratings that are holding the historical highest numbers of overall amount of experts' ratings.
